Objective

Curious and motivated Computer Science student with a strong interest in Artificial Intelligence and problem-solving. Passionate about logic design and software testing, with hands-on experience in academic projects.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Specialization: AI & Machine Learning

2023 - 2027

Technical Skills

Programming Languages: Python (Experienced), C (Experienced)

Frameworks & Tools: Scikit-learn (Intermediate), Swift Frameworks (Basic)

AI & ML Concepts: Machine Learning (Intermediate), Deep Learning (Basic), Multi-Agent Systems (Basic), AI Agents (Basic), Applied ML (Basic)

Other Skills: Logic Design (Intermediate)

Experience

Academic Projects:

- Logic Design & Software Testing: Contributed to the QuickRoll project by assisting in logic design and thorough testing to ensure smooth functionality.

Projects

- Diabetes Prediction: Developed a model to predict diabetes using machine learning techniques.

- Expense Tracker: Created an application to track and manage personal expenses.

- Recipe iOS App: Designed and implemented an iOS application for browsing and saving recipes.
